## Report of Working with Geodesics

Under the able guidance of Professor Milind Khairnar and Aditya Sahani Entrepreneurship and innovation cell organized an event titled Working with geodesics from 31st August 2019 to 2nd September 2019. The workshop had 10 participants of BE and this event was held after routine college hours. The timing for sessions each day were 5:30 pm to 7:00 pm. The workshop was aimed at teaching creative use of Geometry and creating beautiful and useful objects. The workshop was held to inculcate innovation as a booming force towards enduring success. With the guidance of Professor Milind who had made these balls before, the students had a really good time in creating them and this in turn helped them work in teams as well, the parts were really delicate and needed more than one person to do the whole process. The math behind the geodesics was explained by Professor Milind and it was a treat to solve the math out on paper. The event ended with the balls being presented to Dr. Bhavesh Patel, Principal of SAKEC as a token of appreciation for letting us perform this activity.
